

# Rentokil Steritech

The Experts in Pest Control

## Fight organic debris with CleanBlitz®

Sanitation and cleaning have a direct impact on pest control. Small flies and other pests are attracted to organic debris such as food build-up, drain slime, and other waste. Cleaning hard-to-reach areas and drains where this debris is found can be tedious. Now, you can fight back!

With Rentokil Steritech's CleanBlitz® Foam and CleanBlitz Tablets, you can reduce organic debris and boost your cleaning and sanitation regimen.

### CleanBlitz® Foam: A safe, effective cleaning product

Food debris and organic waste accumulate in cracks, crevices, floor-wall junctures, under and behind equipment, soda machine and beer tap drain lines, floor drains not easily cleaned with a brush, and more. These areas are often hard to access, so they get overlooked during daily cleaning, allowing debris to build up over time.

Rentokil Steritech's CleanBlitz Foam is an easy-to-apply, ready-to-use product that helps you fight stubborn organic debris wherever it builds up. As part of a daily cleaning program, CleanBlitz Foam puts the power to enhance your cleaning program in your employees' hands.

CleanBlitz Foam is a highly concentrated blend of microorganisms scientifically chosen for their ability to digest the fats, oils, proteins, starches, and other organic wastes commonly found in hard-to-clean areas. Formulated with cultures of non-pathogenic bacteria that are naturally occurring, not genetically engineered, CleanBlitz is a safe and easy-to-use cleaning solution for your staff.

### CleanBlitz Tablets®: Protection for your floors

Floors in your facility have it rough. In addition to everyday foot traffic, they can take a beating when heavy equipment is wheeled across them, items are dropped, or power hosing damages grout. Dirt, food debris, moisture, and other organic waste can become trapped in cracks, chips, along baseboards, and even in ordinary grout. That can make your floor the source of odors, attract pests, and generally dull the overall appearance of your facility. To help you protect your floors with ease, use Rentokil Steritech's CleanBlitz® Tablets, which penetrate those cracks and damaged areas and stay there to fight organic debris.

CleanBlitz Tablets are an effective biological water treatment that can help break down organic waste and food debris to supercharge your cleaning routine. Simply mix an effervescent tablet into your mop water with your regular cleaner\* and mop as you normally would. The ingredients in the powerful tablet go to work, attacking stubborn dirt and organic debris and removing them from your floors.

### CleanBlitz® Foam

- Floor drains
- Bar tap drains & soda fountains
- Baseboards
- Behind and under kitchen equipment
- Bathrooms, urinals and around fixture bases
- No mixing - shake & spray
- Small areas of organic debris clean up in 1 to 2 applications

### CleanBlitz Tablets

- In mop water for cleaning floors
- Behind and under kitchen equipment
- Floor drains
- Baseboards
- Bathrooms, urinals and around fixture bases
- Removes substantial buildup in several applications

## Simple and easy to use

# Application instructions

CleanBlitz® supercharges your daily cleaning routine. Whether you're using our ready-to-use CleanBlitz® Foam or preparing your mop water with CleanBlitz Tablets, the power to eliminate pest-attracting organic debris – even in the toughest areas – is now in your employees' hands.

### Where and how to apply CleanBlitz® Foam

Packaged in a simple “shake and spray” ready-to-use can, it requires no mixing or pre-treatment, making it easy for anyone to use.

Perform routine cleaning. Shake can and apply foam to area. Wait at least 2 hours. Rinse area or flush drain with water before use. For detailed application instructions for areas other than those listed here, see product can.

**Beer and soda trays:** Lift tray and spray CleanBlitz Foam on the inner surface daily.

**Baseboards:** Spray CleanBlitz Foam on the surface of damaged baseboards and wall gaps daily. For large areas, use CleanBlitz Tablets.

**Floor drains:** Hold CleanBlitz Foam upside down and fill the floor drain daily, or insert tube into drain and fill the drain daily.

**Ongoing:** To prevent organic debris accumulation, make regular applications to freshly cleaned drains, drain lines, and other areas where build-up occurs.

### How to use CleanBlitz® Tablets in mop water

At the end of each day, simply drop one effervescent tablet into the mop bucket prepared with water or with the soap or cleaner\* of your choice.

- Allow 2-3 minutes for the effervescent tablet to dissolve. Mop floor normally, focusing on cracks, crevices, and spaces under equipment.
- When mopping is completed, pour the mop water into the open floor drains. If possible, pour equal amounts of mop water into each drain.

\*For best results: Mix with biodegradable and environmentally friendly cleaners; use CleanBlitz at the end of the day; DO NOT rinse after or use anti-microbial products immediately after application; DO NOT mix with bleach; DO NOT mix with extreme pH cleaners; DO NOT exceed manufacturer's application recommendation for bleach and/or harsh cleaners.

---

Tough to clean areas are no match for the power of CleanBlitz® Foam and CleanBlitz® Tablets.

---

For more complex drainline and greasetrapp maintenance, Rentokil Steritech can provide full service bioremediation.

- Increase drain-flow capacity and proper function
- Reduce outdoor grease interceptor pumping frequency by at least 50%
- Reduce small fly breeding sites
- Reduce drain-related odors
